

Performance curves Outer diameter holding force

Parallel chuck (single /double action)

Single action : HC-5S/HC1-5S-C1 • HC-10S/HC1-10S-C1 • HC-20S/HC1-20S-C1

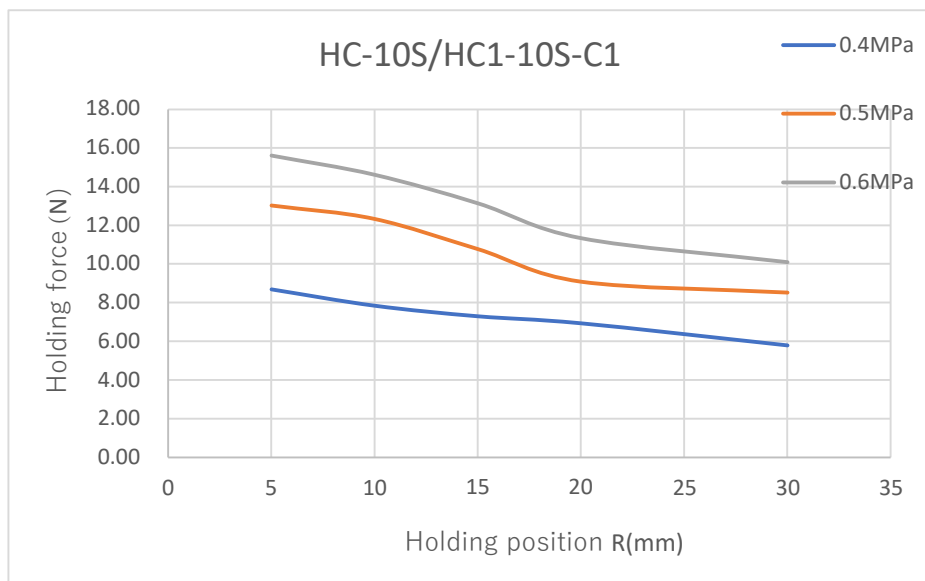

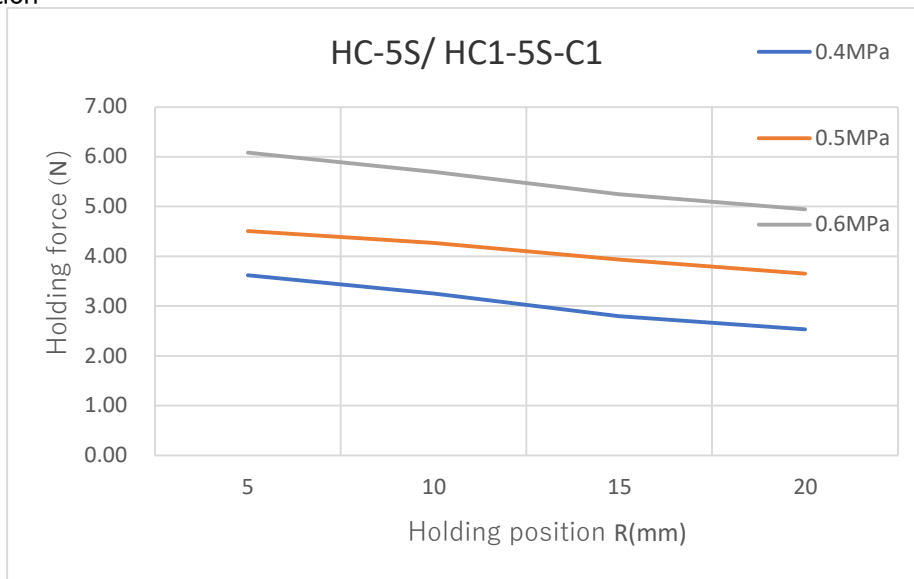

Double action : HC-10/HC1-10-C1 • HC-20/HC1-20-C1

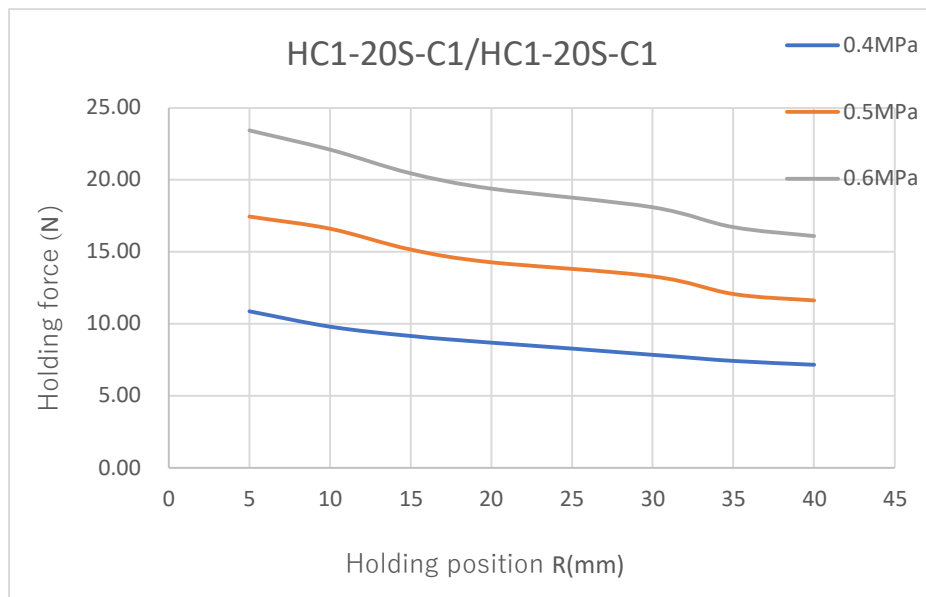

It indicates the gripping force acting in the closing direction (gripping outer diameter) at the length R from the top surface of the parallel chuck to the workpiece gripping position at each supply pressure (Mpa). (Values measured by our company's measurement method).

Closed direction (outer diameter holding force)

• Single action

Closed direction (outer diameter holding force)

•Double action
